DUEVEL Bella Luna Diamante

loudspeaker

DESCRIPTION

The Bella Luna Diamante is a state of the art omni-directional loudspeaker. Imagine your listening room as an open field. It is late at night. The "Beautiful Moon" shines down upon you as your favourite music plays. The Bella Luna transports you to another place, another time and another dimension at your will. These transducers have the complete and total ability to transform your listening space into a live concert venue. The musical signal is reproduced as nature intended. The Bella Luna is in phase in every direction, always; it is perfectly time aligned and has completely natural sonic propagational properties. Low, mid and high frequencies radiate on 360 degrees. Each bottom corner is a bass-reflex port, created with a special octagonal internal bracing, and a tuning method used exclusively in Duevel speakers. Perfect for mid-sized listening spaces, easily driven by low power amplifiers. The Bella Luna are music lovers' *sister soul*.
