DUEVEL Planets loudspeaker

DESCRIPTION

The Planets are small and elegant floorstanding omni-directional loudspeakers as all the other Duevel products. Their discrete dimensions allow their integration in any interior, but don't prevent them to fill the room with a very lively and powerful sound. Creating truly high performance speakers on a strict budget is no easy task; Duevel delivers a perfect solution.

Casting aside typical box speaker design, we have broken through a new sound/price barrier. Combining years of design experience and great success in the field, the Planets are nothing short of remarkable. Utilizing a 5" woofer and a 1" horn loaded tweeter, simple and ingenious crossover technology, reflective spheres and a finely tuned bottom ported cabinet results in a speaker which performs well beyond the imagination. Deep tight bass notes, midrange glow and clarity, fast transparent highs provide the listener a rare musical experience at a highly competitive price point.

Stunning speakers for stereophony and home theater playback, the Planets orbit around any lifestyle and fit into any room. Available in black (other colors on special order).

Jason Hector, HiFi+

If you are interested in trying out a pair of omnis I cannot think of a more cost effective starting point.

Adam Smith, Hi-Fi World

I found the Planets eminently enjoyable to audition and, returning back to "normal" loudspeakers afterwards was a bit of a comedown.

Ian Harris, Hi-fi news

In short, the Planets offer a spatial performance nothing less than revelatory at the price.

Sandy Greene, sonicflare.com

"These super cool little guys just arrived this week and I can't stop listening to them. They sound so much bigger than they are for many reasons..."

DUEVEL Planets

loudspeaker
