* On special order

1) These prices are for the current line. Lengths are in cm.

2) All the Audiomat products distributed and manufactured by Mutine are special North-American versions, with dedicated 120 volts power supply transformers, a double-box package, Mutine MPC Power Cord with Hubbell connector, an User Manual, and Mutine's extended warranty.

3) All the CEC products distributed by Mutine are special North-American versions, with dedicated 120 volts power supply transformers, a double-box package, Mutine MPC Power Cord with Hubbell connector for all models above 1,500.00 Cad and Mutine's warranty performed in our Service Centers in Canada and the Usa.

Beware of 100 volts japanese versions CEC imported on the gray market: they are incompatible with North-American standards, sometimes delivered with a wall plug-in transformer; because of this, they present a fraction of their sonic potential. On top of this, they carry a Japanese warranty, implying that your product must be sent back to Japan in case of problems.

4) The Duevel loudspeakers are available in many colors and finishes. Ask Mutine about the delays.
